

Embryo

Embryo proteins up-accumulated between 0 and 24HA
(265 proteins of which 139 are germination-specific)
A log2ratio value of +5 was assigned to germination-specific proteins.

Embryo proteins down-accumulated between 0 and 24HA
(152 proteins of which 42 are dry seed specific)
A log2ratio value of -5 was assigned to dry-specific proteins.

Endosperm

Endosperm proteins down-accumulated between 0 and 24HA
(109 proteins of which 15 are dry seed specific)
A log2ratio value of -2 was assigned to dry-specific proteins.
